

## Thoughts Of A Friend Of Mankind

From hundred lightyears far away  
I came to you to say,  
Humans, so many you are,  
we think you've gone too far.

You seem to be an intelligent race,  
so why destroy this beautiful place  
that you call Earth or Terra ?  
We think you've gone too far.

I look at this dying planet  
and I refuse to believe it  
the way you're killing it more.  
We think you've gone too far.

You kill each other ! Why can't it be  
that you live in peace and harmony ?  
How could we live with such a neighbor ?  
We think you've gone too far.

Hundred times you could destroy Earth,  
but don't you see, there's no rebirth ?  
I see no sense in your mad behavior.  
We think you've gone too far.

If you cannot learn from your past  
you will suffer and die at last.  
There's no logic. What is it for ?  
We think you've gone too far.

So I will do what I have to do  
because we think it's best for you.  
There's only this one formula,  
so you will never again go too far.
